

Mosoraški smjer

B. Kambič, B. Kulić (1957)

Approach: Follow the trail along the base of Anića kuk cliff. A wooden sign shows you to the start of the route (20 m easy scramble).

Descent: Marked trail over the top of Anića kuk, then left and back on the same trail along the base of the cliff.

Belay anchors: mostly oversized cemented rings
Protection: sparsely bolted (beware, routefinding!)
Note: a very popular route (polished, crowded)

Changelog for v1.1: The grades have been updated according to the latest Paklenica 2017 guidebook. Some corrections were made to reflect the current state of the route after a major rockfall in 2017. **Special thanks to Lutz Dörnemann** for noting the number of bolts and lengths of each pitch while climbing together on 21st Oct 2019.
